Rotary English Medium School – 9.2/10 CGPA [2019]

SKILLS

PYTHON PROGRAMMING

- Data Types, Loops and Functions
- Object Oriented Programming (oop's)
- Exception Handling
- File Handling

C, C++, JAVA, FULLSTACK(Servlets), DATABASE, GIT, DOCKER

Problem solving, Debugging, Communication, Analytical skills

ACHIEVEMENTS.

- Completed **Internship** in Embedded Systems at Microchip AICTE Edu Skills.
- Completed **Internship** in Android Development at Google for Developers AICTE Edu Skills.
- Participated in web design at RIPPLE2k24 event in RGM .

PROJECTS

C Declarations Translated to Telugu

- The project involved creating a web application that could accurately translate C declarations from English to Telugu. This would enable Telugu-speaking developers to write C code more efficiently and effectively..
- I used python flask to develop the translation , which involved parsing the input English declarations, analyzing their structure, and generating the corresponding Telugu equivalents.
- I also worked on the user interface of the web application, making it easy for users to input C declarations and view the translated output..
